

We put holes in a plastic glove and filled it with water so kids could milk the cow they made.

10/9/2012

We are learning about the topic of Farming and farm animals. Studying and playing within the theme of farm and farm animals allows us to learn about a variety of topics in ways that develop children's general knowledge and vocabulary skills. Children have learned that chickens hatch from eggs and about the life cycle of a chicken. They have examined seeds and planted them in our garden. This activity shows children the plant life cycle and what plants need to grow. We read a book about how milk gets from the cow on the farm to the carton in the store.

Sorting seeds.

Pretending to be farm animals.
