

Discovering the Dinosaurs

During the month of April, the afternoon class was studying dinosaurs. To make the stories interactive, the preschool took a special field trip to see the Discovering the Dinosaurs exhibit at the TCC.

Students watched movies about dinosaurs, interacted with animatronic displays, and participated in a dino-dig. 4-13

Lindsey meets the Pachycephalosaurus

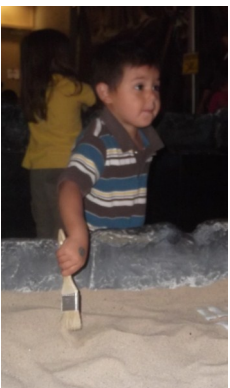

Menachem and Mathilda interact with the Spinosaurus display

Damian and Marley animate the Apatasaurus using the interactive buttons on the display.

(Above) Nadine and Jameson learn just how tall Triceritops really was as they reach up to touch his nose

Eduardo, Jameson, Damian, Menachem, and Lindsey participated in the dino-dig, using brushes to try and unearth fossils. Teachers support by having students guess what dinosaur fossil they have as they dig up the bones.
