

Making Pickles

While reading the Little Red Hen Makes a Pizza, students participated in making pickles. Students smelled each different ingredient which included; mustard seed, dill, pepper, and vinegar, and were asked to guess what the ingredient was based on the smell. After the ingredients were mixed together with the sliced cucumber, the pickles were allowed to sit for 24 hours. The next day students tasted the classroom made pickles and compared the taste to store bought pickles. 12-12

"Pepper!"

"It (dill) smells like mint"

"It smells like glue"

"Like Easter Eggs"
